1. Register for MFA	3
2. Logging In with MFA (Post Setup)	4
3. Change / Update MFA Settings (Post Login)	5

iRISIRP

This guide explains how to log in to IRIS IRP securely using your credentials and how to set up Multi-Factor Authentication (MFA) for added security.

1. Register for MFA

- → Log in to <u>https://einvoice6.gst.gov.in/login</u> using valid credentials (email/mobile no. & password)
- → If you haven't set up MFA previously, you will be prompted to register for it. This is a mandatory step, and you will be able to access your account only after the MFA setup is successfully completed.
- \rightarrow Click on 'Proceed'. You'll see:
 - Login Credential: Your registered login (email or mobile) shown as readonly.
 - ✤ Alternate Credential: You must provide the alternate one (e.g., if login is email, enter mobile and vice versa).
- → Click "Send OTP". OTPs will be sent to both credentials (login and alternate) separately. Enter the OTPs in two separate input fields and click "Validate".
- \rightarrow If both OTPs are correct, MFA is activated for your account, and you are logged in to the portal.
- \rightarrow If any of the provided OTPs are incorrect, MFA will not be activated, and you can resend the OTP after 1 minute to try again.

2. Logging In with MFA (Post Setup)

If you've already set up MFA, your login flow includes an additional OTP step:

- → Log in to IRIS IRP using valid credentials (email/mobile no. & password)
- \rightarrow A single OTP will be sent to both your registered credentials (email & mobile).
- \rightarrow You will see **one OTP input field**. Enter the received OTP and click Login.
- \rightarrow If OTP is correct: Login successful.
- → If the provided OTP is incorrect, you will get an error. You can resend the OTP after 1 minute to try again.

3. Change / Update MFA Settings (Post Login)

You can also update your MFA settings anytime from your profile:

- \rightarrow Log in to your account.
- → Click on your Profile > Navigate to "Setup MFA" (next to Change Password).
- \rightarrow Your login credential will be shown (read-only).
- \rightarrow Your **previous alternate credential** will be shown (editable).
- \rightarrow Enter your new alternate credential.
- \rightarrow Click "Send OTP".
- \rightarrow OTPs will be sent to both credentials (same as first-time setup).
- \rightarrow Enter both OTPs and click "Validate".
- \rightarrow If both OTPs are correct, MFA settings will be updated.
- \rightarrow If any of the provided OTPs are incorrect, an error message will be shown. You can resend the OTP after 1 minute to try again.
